

CHARACTERISTICS

This analogue multi-display watch has timing functions.

CHRONOMETER

It can measure up to 59 minutes and 59 seconds.

REMONTOIR

For normal operation, the crown must be in position 0.

The crown in position 1 allows your watch to be updated.

The winding mechanism in position 2 sets the time of your watch and indexes the timing hands.

CHRONOMETER OPERATION

1 - Pressing push-button A: start of the stopwatch.

2 - Pressing push-button A: stop the stopwatch.

3 - Pressure on push-button B: return to zero of the chronograph.
